The majority of the people of Malatya make their living through agricultural activities. Apricot, wheat, sugar beet, barley, chickpea, lentil, corn and rye are the most important agricultural products grown in Malatya. Malatya apricot is ideal for the production of delicious dried apricots due to its content and flavour. For this reason, 70-75% of the world's dried apricot production is produced from Malatya apricot. Dalbastı cherry, which is grown in Yeşilyurt and Gündüzbey regions, has received Geographical Indication with its large, fleshy structure, special content, aroma and flavour and is one of the most produced fruits in Malatya. The characteristic of Narmikan melon is that it grows without water and has a high sugar content.

In Mielec and in the surrounding area a lot of people grow fruit, such as apples, pears, plums and cherries. They have those fruit trees in their gardens and there are also huge orchards with different varieties of apples, pears, plums and cherries. People can buy fruit from local farmers at the market. Apart from fruit, most people grow carrots, cucumbers and tomatoes in their gardens or in their allotments. There are a lot of farmers who grow them on a large scale. There are also garden markets in Mielec with enormous greenhouses with different varieties of tomatoes and cucumbers.

Olive trees thrive in the Attica region. Athens and its surroundings produce high quality olives and olive oil, a cornerstone of Greek cuisine.

Many famous vineyards in Attica (such as in Mesogeia) grow grapes and produce fine wine. Varieties like Savatiano are commonly used for retsina wine, a traditional Attica specialty.

Lemons, oranges, and mandarins are commonly grown in gardens and small orchards around Athens.

Beekeeping is a popular activity in Attica, with thyme honey being a notable product due to the abundance of wild thyme in our region.

A large portion of the people of Sakarya earn their livelihood through agricultural activities. Corn, wheat, hazelnut, rice, sunflower, vegetables, and fruits are among the most commonly grown agricultural products in the region. Especially in the northern parts influenced by the Black Sea climate, hazelnut production stands out. The rice cultivated in Sakarya is known for its high yield and quality and is grown on extensive fields. Geyve quince, grown in the Geyve and Pamukova plains, has received a Geographical Indication due to its juicy texture, large size, and aromatic taste. Additionally, chestnuts and cherries grown in the Sapanca region are among the prominent products in terms of flavor and aroma.
